Subject: Meeting with the HF and Pavillion research teams

Hi Gary.

Hope you had a good first week in Ada. Sorry I wasn't in town to greet you. I understand, through the grapevine, that you would like to meet with various GWERD research teams over the next few weeks (which makes good sense). I expect you'll want to meet soon with researchers working on the Pavillion investigation and the Hydraulic Fracturing study given their priority and sensitivity. I expect both teams could meet with you next week if you have time. Given current staff schedules, I would suggest the Pavillion research team meet with you next Monday or Tuesday PM and the HF study team on Tuesday PM (next week is fall break for Ada schools, Wed-Fri, and several staff will likely be on leave).

Let me know when you are available and I will set up meetings with both teams.
